Web Development with HTML5

Assignment 2: Writing your first HTML page

Objectives

This assignment is aimed at assessing the student's practical understanding and use of the the following HTML tags
- h, p, hr, br, em, i, b, strong, mark, sub, sup as well as the basic structure of an HTML page.

Pre-requisites

- Successful completion of Quiz 2 in module 3 of the course (in the course platform)
- Successful setup of student's computer to write code for HTML & CSS (See course platform for how to do this!)

Assignment description

You are going to write a little bit about yourself
- your name,
- where you live,
- what you love doing and your favorite sports team,
- what you do most when you are watching the TV

The final product should be as described below

About me

My name is <u>Bernard Longho</u>. I live in Sweden. ← Replace my name and Country of residence with yours

I love **programming** and **teaching** people how to program. ← What are your two things that you like doing?

My favourite football team is *Mount Cameroon FC*. I watch lots of football matches on TV but sometimes i ~~clap~~ play too. ← Your favourite sports team and what you mostly do while watching TV. If you do not have TV, what do you like doing in your spare time? Pretend to make a mistake and strike through it and write the correct one!

The super market that I last visited is:
Stjärntorget 13C
169 79 Solna
Sweden. ← What is the address of the last super market that you visited? If not a super market, what is the last shop or local market that you visited? Address (and name if you want)

All quadratic equations are of the format $ax^2 + bx + c = 0$.

Chemists say that the chemical formula of **Oxygen** is O_2. ← Try as much as you can to make these to be exactly the same. Be creative!

Thanks for reading my first HTML document. ← Write whatever conclusion here but not that there is an extra vertical space between the last text and this one. How can you achieve that?

The title should have the text "About me"
The file name should be called "assignment1.html
The main heading should have the text "About me"

Submission

Submit one .html file called "assignment1.html" in the submission box.

Tips for higher grades
Wherever possible, use Semantic elements
